THE GREATEST PUZZLE OF ALL

- by -

CLARKSON DYE

(Author of: Through Solid Walls; On a Hill is Puerto Rico; Physics and Biology in Psychical Research; Vocational Guidance for the Blind.) Foreword by Stanley Beck, who says in his comment: 'I cannot believe it was the author's intention in writing this book to convert its readers to spiritualism. . . But only to convince humanity of the reality of spiritual forces and of our survival after physical death.

The text is divided into 11 short chapters with topical sentences introducing each. Ch. 1 - A Challenge to Scientists. Is survival after physical death a mystery beyond their solving? Ch. II -- Proven Facts require no logic. Ch. III - Scientists have neglected a phase of human welfare. Ch. IV - World order, religion and destiny.

Ch. V. The problems of a crowded world. Ch. VI -Human relations a pivotal issue. Ch. VII - Explorers who found a new universe. - Ch. VIII - A Path toward new goals and wider horizons. Ch. IX - Urgent need of a well defined program. Ch. X - An opportunity to benefit humanity. Ch. XI - Summary of pertinent facts. (Pg. 65; appendix and bibliography.)

This book is not an argument or treatise, nor does it depend on pages of strange happenings and seance phenomena. It is, however, an impressive collection of distinguished names from all walks of life, reciting their acceptance of survival and communication. And the "Puzzle" of the title is of course the too-common neglect and denial of these all-important facts. This is, in short, the best 'first book' for the newcomer which has been published for many years. Because its approach is not doctrinal or religionistic or otherwise biased, the book should be in the hands not only of uninformed adults, but accessible to adolescents as well, as an honest and factual presentation.

The author, Clarkson Dye, has recently passed over, and when the few remaining copies are sold, no reprint can be expected. Order one copy at $1.00, or 3 for $2.00 (as gifts for friends) - from Borderland Sciences Research Associates -- 3524 Adams Ave., San Diego 16, California. - Or order from: Mrs. Emily Fawcett- 555 South 12th St., San Jose', California.

THE PRICE OF THE MIMEO BOOK,- "THE COMING OF THE GUARDIANS"

will be increased to $4.00 on and after April 15, 1957. Orders received prior to that date will be filled at the formerly advertised price of $3.00 each. The increase is made necessary by the continued rise in the cost of paper and other mimeo - print supplies.

The BSR is not a commercial publishing house and cannot supply book dealers or allow the usual dealer's discounts. We publish mimeographed books and brochures primarily for the benefit of our Associates at close-to-cost prices. Only about 200 copies of "The Coming Of The Guardians" are available at this time.

The essentials of this book are "An interpretation of the Aeroforms (flying saucers) from the other side of life" - a summary of statements by the Mark Probert Controls during the last ten years. It is unique among "saucer" books, and the compiler believes it to be basically sound, and the clue to a great mass of complex phenomena.

Unless or until a publisher can be found who will issue a printed edition, probably no further copies will be available. For this reason the BSR Directors prefer to sell not more than ONE copy to each purchaser. ---

In ordering, please add .10 to the $4.00 or $3.00, to cover mailing costs. The mailing weight is 15 oz. -- Please make checks payable to: Meade Layne, Director BSRA, 3524 Adams Ave., San Diego 16, California.

We wish to thank the Associates who have patiently awaited the publication of this book during more than eight months of delay.

A LETTER FROM ARTHUR CONSTANCE

Author of THE INEXPLICABLE SKY

To the BSR Director and Associates.

I have long been convinced that UFO researchers in all countries need to realize the real nature of the problem before they can hope to make progress toward an explanation of the phenomena - as distinct from the repetitious recording of sightings. It may even be that the Etherians are unable to make any progress in communication because of this fact: the reluctance of students of the phenomena to realize that the problem is incapable of solution until the time and space factors are removed from the equation. Yet the removal of these factors - in other words, the dismissal from our minds of symbolisms inherently unsound - is a crucial problem in itself.

All naked eye sightings in recent years have assumed the reliability of three-dimensional vision, based on Euclidian geometry and Newtonian physics. Sightings have been recorded using such terms as "up", "down", "solid" etc. with computations related to "speed", "miles per minute" etc. Few have questioned the validity of such terms. The UFO magazines are filled with accounts of 'objects' which have 'travelled' at 'speeds' of so many 'miles per hour'. All such terms are merely convenient symbols for our daily lives, workable but still arbitrary.

When a child plays in a room, and visualizes the chairs as ships, and this or that area of the room as 'shores' on either side of a 'sea', it is using symbolisms which 'work'. When a scientist uses terms like 'light-years', they work, but they are no more than symbols of convenience. When you walk from one part of your city to another, you have convenient Euclidean symbols, purely arbitrary ones, such as the point, the line, and geometrical figures like squares and curved plane figures, which 'work'. You see a house or a park seat, and its 'shape' - made up of geometrical figures - changes continually. Its 'size' enlarges as you approach it. Its 'colour' changes from moment. The sun goes in, the tones are darker, etc. All these changes proceed without cessation, and they affect everything you 'see' with three-dimensional vision. They are all relative to you as an observer. None are absolute or 'real'. We UFO researchers have never really acted, in our recording and examination of sightings, as though we believed these facts, which show that all three-dimensional vision is illusory, a mere makeshift.

What are the implications of four-dimensional vision? How can we build a non-Euclidian geometry. These are our basic questions. I am trying to answer them in a new series of articles beginning in the January-February issue of the London Flying Saucer Review. I stick my neck out for the axe with my first article: Screwing Down the Lid on Euclid. If the axe falls and I am decapitated, I shall still run around like a headless chicken, seeking a solution. If I keep my head I may - God helping me - find one.

A.C.

In connection with this letter, see our article on page 14 of this Round Robin - Metaphysics as the indispensable complement of science. The English essayist is not assuming that our Associates are ignorant of the simplest applications of relativity, but protests against our failure to apply this, and the naive materialism which results. As to the UFO, he is thinking of true space-ships rather than the 'Discs' or 'saucers.'

SPACEMEN -- FRIENDS AND FOES ---

(a Brochure in two parts, by T. James)

A full decade has now elapsed since the BSR Associates first received, thru the deep-trance mediumship of Mark Probert, the basic interpretation of the phenomena of the UFO or "flying saucers". The data of the then-current happenings w a s scanty, and the comment of the Controls was casual and restricted. These com - ments have been much amplified since, but never retracted or contradicted. All the phenomena now current or on record can be interpreted from this basic point of view. Nearly all adverse comment has arisen from lack of understanding of what the so-called etheric interpretation really implies.

(The Controls have never asserted, for example, that all the UFO are etheric in origin, or inter-planetary, or beneficent, or malicious. They have been realistic, detached and informative, and constantly aware that metaphysics and superscience are taboo in most of our thinking. They gave us the Key - but 'if you do not care to use it, let the door remain closed.'

(All this is introductory to the Brochure named in our heading, and is set down here for the excellent reason that its thirty-four pages confirm almost point by point all of the principal statements made by the Probert Controls. And we have every reason to accept and believe that prior to the writing of SPACEMEN, Mr. T. James (a pseudonym) had never heard of Mark Probert, or of the BSRA and their pub- lications. No - this by every appearance is honest and dependable psychism, with- out mysticism, religionism, or 'uplift' propaganda. The Communicator from the 'other side', or Astral if you prefer, is ASHTAR - a name already familiar to a great number. The story of his contact with Mr. James is detailed in SPACEMEN.

For nearly two hours the BSR Director checked statements in SPACEMEN, verbally, with the YADA DI SHI'ITE (Mark Probert being in trance meanwhile). Though the Yada commented and expanded, he steadily confirmed. After ending the interview he returned briefly with a message for Mr. James (who was not present): "Tell Mr. James that he talks too much - and too close to the truth. He is in danger from the enemies of truth." It may be of advantage to friends of Truth, to quote this warning here and now - though given in confidence.

Unless you are realistic and somewhat tough-minded, you may find many things in SPACEMEN which are distressing and even frightening. The nature of the under- ground people, of the core of the planet, of the darker aspect of the Astral world, of the cigar-shaped craft, of elementals, of air 'accidents' which are not accid- ents - the repeated assurance that "no valid explanation of the saucer mysteries is possible on a purely physical basis" - these and scores of similar topics find their first realistic statement in SPACEMEN. But the weapon against FEAR is KNOWL- EDGE - not ignorance, not the hoodwink; so that Ashtar says (at the end of Part I)
"Fear is the lubricant, the food and the vehicle of the dark forces. With- out fear you are impregnable, so strive for this attainment."

A new world is in the making. It is an unthinkable world unless you have the new knowledge - and can face up to it. If the basic principles of the BSR are yours also, SPACEMEN - FRIENDS AND FOES may be all-important to you. It is a mimeo. brochure in two parts, 34 pages in all. Both parts for $2.00 (total price).
